this book is intended to be used as a basis for developing courses in
entrepreneurial finance while many universities particularly in the united states
have entrepreneurial finance on their curriculum there is often a gap between
the large selection of entrepreneurship courses and courses providing
applicable hard skills in finance and accounting early stage ventures cannot
succeed without capital and careful management of cash flow for example
entrepreneurs need skills such as how to negotiate with investors so that they
don't end up giving up the control of their venture too early this book aims to
fill this gap by providing guidelines for how successful courses can be set up
to train finance accounting and corporate strategy students for a career in the
start up and venture capital industry
